

# PARTHIBAN S.

INTELLIGENT AUTOMATION | AI-ENABLED PROCESS  
TRANSFORMATION

Chennai, India  
+91 8825565199  
Rkoparthiban28@gmail.com

## PROFESSIONAL SUMMARY

Automation-focused shipping and logistics professional with 9+ years of experience across process operations, customer experience, special cargo quotations, import coordination, pricing, documentation, and workflow improvement. Hands-on experience converting manual and rule-based work into practical solutions using Python, Power Automate Desktop, Excel VBA, .NET/C#, and UI automation. Passionate about Generative AI, Agentic AI, prompt engineering, Copilot Studio, and scalable intelligent workflows. Strong in translating business challenges into automation concepts, prototypes, and reusable solutions while collaborating with stakeholders and subject-matter experts.

## CORE SKILLS

|                             |                                                                                                                                                                                               |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AI & INTELLIGENT AUTOMATION | Generative AI • Agentic AI concepts • Prompt engineering • AI-enabled workflows • Human-in-the-loop design • Conversational AI • Proofs of concept • Responsible AI awareness                 |
| PLATFORMS & PROGRAMMING     | Microsoft Power Automate Desktop • Copilot Studio • Azure AI Foundry • Power Platform • Python • .NET/C# • Excel VBA • PyWinAuto • FlaUI • Advanced Excel • Salesforce CRM                    |
| ARCHITECTURE & ENGINEERING  | Solution design • Workflow orchestration • Reusable automation frameworks • Modular architecture • UI automation • Error handling • Retry logic • Audit logging • Testing and troubleshooting |
| PROCESS & LEADERSHIP        | Process transformation • Automation feasibility • Root-cause analysis • OOG quotation • Shipping operations • Stakeholder engagement • Cross-functional collaboration • Knowledge sharing     |

## PROFESSIONAL EXPERIENCE

### MAERSK

Nov 2022 - Present

#### Senior Process Expert

Analyze complex shipping and logistics processes to identify opportunities for intelligent automation, standardization, and manual-effort reduction.

Translate operational requirements into practical solutions using Python, Power Automate Desktop, Excel VBA, .NET/C#, PyWinAuto, FlaUI, and UI automation.

Design modular automation components with error handling, retries, audit logging, maintainability, and production-readiness in focus.

Collaborate with business stakeholders, process experts, and operational teams to define requirements, assess feasibility, and recommend scalable solution approaches.

Explore Generative AI, Agentic AI, Azure AI Foundry, Copilot Studio, and prompt engineering for operational productivity, decision support, and employee self-service use cases.

Develop rapid prototypes and proofs of concept, including LawgiC, an AI-powered legal assistance application created during Maersk Code Cargo.

Evaluate OOG cargo dimensions, weight, equipment needs, operational feasibility, terminal charges, and surcharges to prepare accurate special-cargo quotations.

Manage customer cases through Salesforce CRM and coordinate with finance, invoicing, delivery order, and IGM teams to resolve disputes, reversals, refunds, and credit notes.

### HAPAG-LLOYD INDIA PVT. LTD.

Jan 2018 - Sep 2022

#### Customer Service - Import Coordinator

Managed import and delivery-order queries across 16 Hapag-Lloyd counters in India, including indemnity bonds and endorsed original bills of lading.

Investigated customer disputes by coordinating with finance, invoicing, delivery order, and IGM teams; supported invoice reversals, refunds, and credit-note resolution.

Used Salesforce CRM to register cases, document actions, track communications, and support resolution within service turnaround expectations.

Identified opportunities to simplify repetitive operational activities through process improvement and automation concepts.

### **AGILITY LOGISTICS, CHENNAI**

**Oct 2017 - Dec 2017**

#### ***Internship Executive - Ocean Export Documentation***

Supported ocean-export documentation, shipment coordination, and validation of shipping information for timely and accurate processing.

### **UNITED ARAB SHIPPING COMPANY**

**Feb 2017 - Sep 2017**

#### ***Process Associate - Shipping Operations & Pricing/Filing***

Supported shipping operations, pricing, rate filing, and maintenance of shipment information while coordinating with internal teams.

## **SELECTED AUTOMATION & AI PROJECTS**

---

**LAWGIC | AI-POWERED LEGAL ASSISTANT** Developed an AI-based legal assistance concept for Maersk Code Cargo to support contract-related and legal queries through prompt-engineered, structured responses.

**OOG QUOTE & OPERATIONS AUTOMATION** Designed automation approaches using Python, Excel VBA, desktop automation, and reusable components to reduce repetitive work and improve process consistency.

**CASE ALLOCATION & WORKFLOW AUTOMATION** Explored hybrid Python, .NET/C#, Power Automate Desktop, PyWinAuto, and FlaUI solutions for case allocation, data extraction, filtering, and WinForms/WPF interaction.

## **AWARDS & RECOGNITION**

---

Received an Extra Mile Award for taking additional responsibility and delivering strong operational support.

Received stakeholder appreciation for initiating Delivery Order process automation using an RPA tool.

Recognized for projects that reduced user effort and improved operational efficiency.

## **EDUCATION**

---

**Bachelor of Engineering - Automobile Engineering**

Rajalakshmi Engineering  
College, Chennai
